# INTERsens 250

Series

Wall- or ceiling-mounted solution for ambient air disinfection with UVC radiation.

## Functional description

UV-C light is short-wave and loaded with energy.

Used selectively, it destroys the DNA - i.e. the genetic information - of viruses, bacteria and other germs. This prevents the reproduction of pathogens and thus

renders them harmless. Did you know? The sun also emits UV-C light. Because of the ozone layer, however, it does not reach the earth's surface.

## Features

Environmentally friendly disinfection. Free of Chemicals and ozone.

Fully automatic operation. No filters. No maintenance.

Digitally validated and certified.
