THE RIGHT MASK FOR THE RIGHT TASK

THE PERFECT BALANCE BETWEEN PROTECTION & COMFORT

O&M Halyard is a leading provider of infection control, surgical, and VAP solutions that help prevent Healthcare Associated Infections (HAIs), contributing to a safer environment for both healthcare workers and patients. HALYARD® Face Masks offer a very broad range of styles, features, and levels of protection.

DEFINING YOUR NEEDS IN A FACE MASK

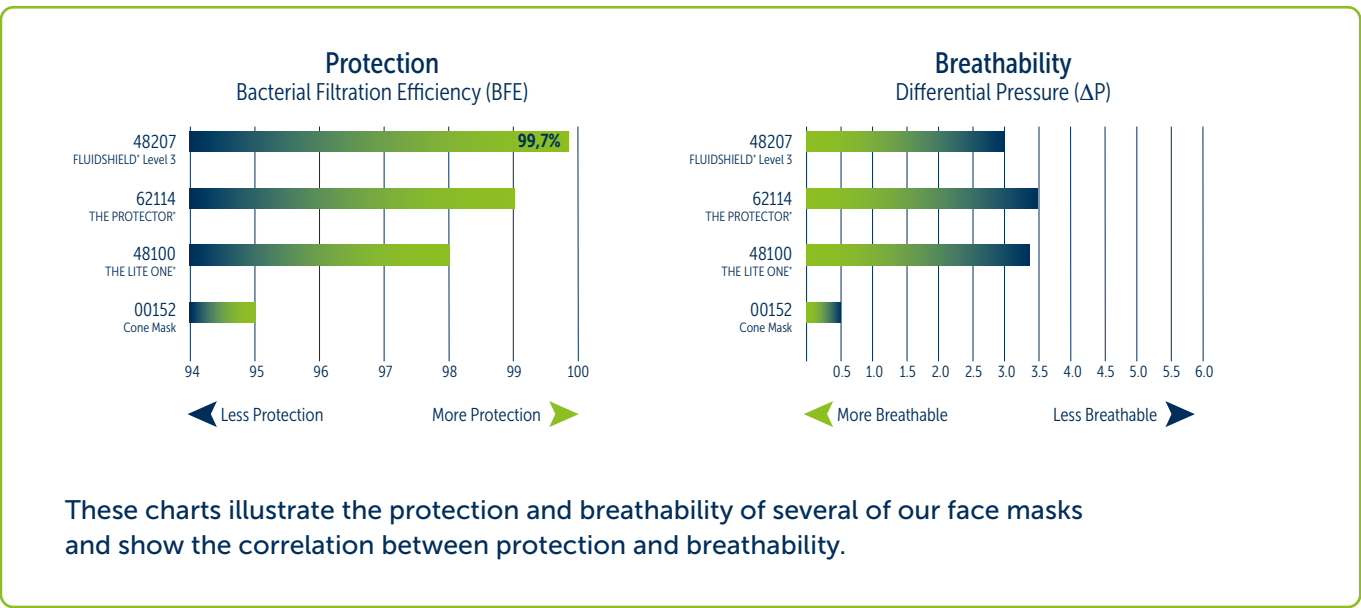

When selecting a face mask, consider the following:

- Protection
- Procedure
- Personal Comfort and Preference

TWO-WAY PROTECTION

The most important element in selecting a face mask is the confidence that comes from knowing that both the patient and the healthcare worker are adequately protected. When addressing facial protection, consider the following:

- What are the airborne infection risks?
- Is there a risk of contact with bodily fluids?
- Is eye protection required?
- Does the patient have respiratory symptoms?
- Is there a potential exposure to laser or cautery plume?

PROCEDURE: WHAT AND WHERE

Selecting an appropriate face mask requires careful examination of the types of procedures that will be routinely conducted and where they will be performed.

- How long are the procedures?
- Is the procedure fluid intensive and is there a risk for splashing and spraying?
- Is it an aerosol generating procedure?
- Does your facility or professional organisation have policies or standards associated with the procedures?

PERSONAL COMFORT AND PREFERENCE

“Breathability” is measured by differential pressure, or ΔP (the difference in air pressure on the inside of the mask vs. the outside of the mask during air exchange). The lower the ΔP, the more “breathable” the mask. Cool, easy breathing comfort encourages healthcare worker compliance – a key component in personal protection.

- How “breathable” is a mask?
- From what materials is the mask constructed?

Just as procedures and environments vary, so do individual needs and preferences. The single most important factor in determining whether a mask is comfortable to a wearer is whether the mask’s features put the wearer at ease. We all have our own styles, likes and dislikes, and a face mask is one of the most personal products a healthcare professional wears.

HALYARD: THE RIGHT MASK FOR THE RIGHT TASK

O&M Halyard offers facial protection products designed to meet industry standards and regulations, such as EN 14683:2019 and EN 149:2001+A1:2009, for specific clinical applications. The materials and donning attachments are sonically bonded, and all masks¹ have enclosed nosepieces to assist in conforming to the contours of the face. All face masks are natural rubber latex & DEHP (di-2-ethylhexyl phthalate) free.

PRODUCT PORTFOLIO

STANDARD FACE MASKS

Protection for General Patient Care.

- Protective three-layer construction
- Exposure to blood and/or bodily fluids is not a risk
- Appropriate for general patient care and isolation

SPECIALTY FACE MASKS

Unique Features to Accommodate a Vast Range of Individual Performance Needs and Clinical Requirements.

- Fog reduction
- Larger breathing chambers for increased comfort
- Patented designs to enhance facial fit

FLUID RESISTANT FACE MASKS

A Complete Family of Fluid Resistant Facial Protection Products. FLUIDSHIELD[®] Level 2 & Level 3 products meet EN 14683:2019 Type IIR standards for facial protection against the penetration of blood and bodily fluids.

- Constructed with a patented combination of materials to resist fluid penetration upon impact
- Features POWERGUARD[®] equipped filter media
- Some feature anti-glare visors
- Offered in a wide variety of styles and features

RESPIRATOR FACE MASKS

Tested and approved according to the EN 149:2001+A1:2009 norm on Particle Filtration Half Masks. The HALYARD[®] FFP respirators are designed to provide an effective facial fit, as required for proper respiratory protection against airborne pathogens.

- Features a large breathing chamber
- Tight facial fit with soft inner facing

EYEWEAR AND FACE SHIELDS

Designed for use in situations where risk of exposure to blood and/or bodily fluids through splashing is possible.

- Lightweight eyewear with colorful frames
- Single-use lenses easily replaced into reusable frames
- Face Shields equipped with a foam band and headband
- Can be worn with glasses or goggles

Climate Protection for Future Growth

Innovating since 1946

Businesses and organizations need to reduce their environmental footprint. We help businesses tackle that challenge while staying competitive. Climate protection is the key to future growth. As a technology company focused on sustainability, we're committed to meeting the challenges of the future.

Our products and services

GoGaS specializes in heating, cooling, ventilation and UV-C disinfection. We offer innovative solutions that address environmental, decarbonization, health and safety challenges and safety.

**We'll always be glad
to help you!**
