Switch to GoGaS sustainable heating systems now and benefit from up to 35/45% government subsidy

The present and future belong to regenerative energy supply. Take the initiative now: Switch to a sustainably operated heating system and take advantage of the financial tailwind of government funding: up to 35% of the total investment of the measures will be covered. If the building is heated with an old oil boiler, even 45% funding is possible when replacing it. Eligible costs range from the dismantling and disposal of the old oil boiler to the conversion and installation costs of the new, sustainable energy supply system.

With GoGaS, you have a reliable and innovative partner in the field of building technology at your side. Thanks to flexible, modular complete solutions, GoGaS offers intelligent heating systems for your individual project. From energy generation to heating, GoGaS offers maximum energy-efficient, eligible systems from a single source.

- Solar warm air collectors
- Warm air heaters
- Tube heaters
- Air distributors

- Electric heat pumps
- Gas engine heat pumps

With the government subsidy, you not only reduce the required investment volume. With the innovative, sustainable system solution of energy generation and building heating, you also save running costs in the long term thanks to the outstanding energy efficiency. The combinations of components and thus the subsidy scenarios can vary. Our experts will be happy to advise you individually so that together you can make your heating system sustainable, efficient and future-proof - and the state will help you.

## This is GoGaS

Established in 1946, GoGaS has become a key innovation and technology partner to many customers and Who is Who in their industries, providing sustainable, environment friendly and innovative turnkey solutions for buildings, manufacturing process up to CO2 neutral operation. The unique portfolio includes a wide range of modular system and turnkey solutions such as IR, UV, UV-C, Air-condition, Heating, Cooling, Ventilation, Solar Systems and others for stationary, mobile and portable in- and outdoor applications. The company is active in several standardization committees, defining the next generation of technology standards such as TGA+.

GoGaS is a stakeholder in leading trade associations and initiatives, e.g. the German Engineering Association e.V. (VDMA), figawa, Export Initiative Energy, ELVHIS. (VDMA), figawa, Export Initiative Energy, ELVHIS. As an active partner of the Sustainability Initiative "Blue Competence", GoGaS is also driving the future of environment friendly and energy efficient planning, building and operating of B2B buildings, thus optimizing its CO2 footprint and maintaining the highest possible asset valuation, ROI and TCO for investors, owners, operators and tenants at the same time. The company is also involved in key research programs of the EU and industrial technology partners. GoGaS provides its customers with turnkey solutions, reducing the number of interfaces, eliminating delays in the Supply Chain and project execution and provides a lifetime warranty and support service.
