

Press Release

Up to 40% Government Funding of total costs for GoGaS Hybrid Heating Solutions, for all existing commercial buildings

GoGaS hybrid Heating Solutions are now enjoying Government fundings of up to 40% of the total costs, replacing old and inefficient systems in buildings. The Funding of the hybrid heating solution ist part of the German Federal Funding Program (BEG EM) and supports the conversion towards renewable energy solutions in commercial buildings.

Funding is granted for both the new hybrid heating system as well as deinstallation and installation costs, incl. the dismantling of old oil heating systems and oiltanks.

The level of funding increases, the higher the percentage of renewable energy usage is. Key building blocks of the GoGaS portfolio included in this funding program are:

- DSX Tube Heaters with the patented TRIGOMAX condensing technology
- HR Family, Warm Air Heaters
- Air Distribution System
- Solar Air Collector, CO2 neutral Heating LUBI WALL (see below)

Funding up to 40% including deinstallation and installation

GoGaS Tube Heaters with condensing technology (Renewable Ready) receive a Base funding of 20%, if combined with the Solar Collector LUBI Wall 30% and if the new solution replaces an old oil heating system 40%. The Solar Collector LUBI WALL is always funded with 30%. Funding is granted including deinstallation and installation costs.

Participation in this new funding program is according to the federal Funding requirement policy incl. ns (ETA S), EN12831 and the ability using one common control system. GoGaS will be pleased sending more details to interested parties as well as provide assistance with the application.

LUBI WALL, Solar Air System

LUBI WALL is a highly efficient Solar Air System. It supports the heating, ventilation and cooling of facilities. For further information click on this link. [GoGaS Goch Dortmund - LUBI Wall](#)

One Stop Shop to a better Future

As manufacturer GoGaS provides its customers with one stop shop solutions. This includes the design of the new heating system including all energy consumption, efficiency and environmental calculations, drawings and on site installation, as well as life time service and warranty.

This is GoGaS

Established in 1946, GoGaS has become a key innovation and technology partner to many customers and Who is Who in their industries, providing sustainable, environment friendly and innovative turnkey solutions for buildings, manufacturing process up to CO2 neutral operation. The unique portfolio includes a wide range of modular system and turnkey solutions such as IR, UV, UV-C, Aircondition, Heating, Cooling, Ventilation, Solar Systems and others for stationary, mobile and portable in- and outdoor applications. The company is active in several standardization committees, defining the next generation of technology standards such as TGA+.

GoGaS is a stakeholder in leading trade associations and initiatives, e.g. the German Engineering Association e.V. (VDMA), figawa, Export Initiative Energy, ELVHIS. (VDMA), figawa, Export Initiative Energy, ELVHIS. As an active partner of the Sustainability Initiative "Blue Competence", GoGaS is also driving the future of environment friendly and energy efficient planning, building and operating of B2B buildings, thus optimizing its CO2 footprint and maintaining the highest possible asset valuation, ROI and TCO for investors,

owners, operators and tenants at the same time. The company is also involved in key research programs of the EU and industrial technology partners. GoGaS provides its customers with turnkey solutions, reducing the number of interfaces, eliminating delays in the Supply Chain and project execution and provides a lifetime warranty and support service.
