# Ambient Air Hygiene & Infection Prevention in Buildings

Sustainable system solutions for infection control in buildings. Free of chemicals and ozone. Made in Germany.

# Modular system solutions, flexible and tailored to your requirements.

Since 1946, GoGaS has been a reliable technology and innovation provider in building and facility technology. Our extensive product range of UV-C disinfection technology ensures the safety of your entire building, in the context of infection protection, simply and effectively.

## Convenient touch-of-a-button operation

Ambient air and surface disinfection in buildings is discreetly done in the background with GoGaS disinfectants. Thanks to highly efficient UV-C technology, INTERx®, and PROsens devices, as well as CAREtaker2 HERO21, sterilize your building, gently and without chemicals.

Multiple awards and distinctions

Learn more about our Health & Safety Products →

**INTERsens® 250R**  
Conference areas,  
meeting rooms, lectern

**PROsens GO**  
Conference area for  
Multimedia Equipment

**CAREtaker2 HERO21**  
For disinfection of complete areas

## Modular & scalable protection for ongoing operation.

With GoGaS' portfolio, you will find the right equipment package for your building's specific configuration, as well as additional spaces, such as restaurants or hotels.

The **INTERx® devices** reliably sterilize ambient aerosols, which are supplemented by the surface disinfection by the **PROsens devices**. The **CAREtaker2 HERO21** completes the overall package with its flexible mode: The self-propelled robot eliminates pathogens in ambient air and on surfaces in just one pass, and can be conveniently controlled via app, or be fully automated.

**LIFTsens® 25/50**  
In elevators

**PROsens H**  
At the Registration

**INTERsens® 250**  
In the sanitation area

**INTERsan® 25/50**  
In small toilets

**INTERex® 25/50**  
At the respective  
exhibitor booths

**INTERlit® 1000**  
Foyer and Lobby

  
**Chemical  
& Ozone  
Free**  
Works without  
chemicals and  
ozone

  
**UV-C  
Safety**  
Certified,  
validated &  
safe

 **UV-C**  
Short-wave and high-energy

Used selectively, it destroys the DNA, that is, the genetic information of viruses, bacteria, and other pathogens. This prevents the propagation of the pathogens and thus makes them harmless. By the way: the sun also emits UV-C light. However, because of the ozone layer, it does not reach the earth's surface.

## PROsens H

- Surface disinfection with UV-C
- For small items such as exhibition badges, ID cards, keys, mobilephones

## INTERlit® 1000

- Ambient air disinfection with UV-C
- For large rooms or foyers
- Floor standing on rollers
- Air capacity: 1.000 m³/hour

## PROsens GO

- Surface disinfection with UV-C
- For larger items such as headphones, microphones, presentation equipment

## INTERex® 25/50 & INTERsan® 25/50

- Ambient air disinfection with UV-C
- For small rooms and sanitary areas
- Air capacity: 25/50 m³/hour

## INTERsens® 250R

- Ambient air disinfection with UV-C
- For normal size rooms
- Floor standing on rollers
- Air capacity: 150/250/340 m³/hour

## LIFTsens® 25/50

- Ambient air disinfection with UV-C
- For elevators
- Air capacity: 25/50 m³/hour

## INTERsens® 250

- Ambient air disinfection with UV-C
- For normal sized rooms. Wall or ceiling mounting
- Air capacity: 250 m³/hour

## CAREtaker2 HERO 21

- Disinfection of entire buildings, or individual rooms, via UV-C light
- Self driving robot
