

Press Release

System solutions with LPG

GoGaS and Drachen-Propangas announce international cooperation.

GoGaS (www.gogas.com) and Drachen-Propangas (DrachenGas, www.drachengas.com) announce cooperation on holistic system solutions for liquefied petroleum gas applications. GoGaS has been a leading provider and innovator of holistic system solutions for the efficient and sustainable operation of non-residential properties since 1946. For more than 60 years, DrachenGas has been one of the leading suppliers of liquefied gas systems with tailor-made solutions for all areas of use and applications.

With the now announced cooperation, both companies strengthen their position and pioneering role, generating numerous benefits for users in several respects.

This saves the user time and money and accelerates all processes from the idea through implementation to acceptance and reliable economic operation and service.

- GoGaS and DrachenGas complement each other in the accelerated and synchronized processing of inquiries, as well as the preparation of project planning documents incl. plans and drawings, installation and time schedules
- Reduction of interfaces and coordination efforts for the customer
- Faster implementation and processing on site, solutions from a single source
- Faster commissioning of the systems

The sustainable and energy-efficient portfolio of GoGaS is used in the planning of building services engineering (TGA). Whether heating, cooling, air conditioning or ventilating, the building blocks from the GoGaS portfolio can be combined with each other in a modular way and interlock with each other. In this way, the systems can be designed to meet the respective requirements of the customer and optimum, sustainable operation.

The mutual integration offers both partners the opportunity to provide the customer with complete turnkey solutions from a single source. The implementation and processing can be carried out by both partners as desired. The customer decides.

More efficiency and time savings for the customer, better ROI

Thanks to the synergies of this international cooperation, not only can overall costs be reduced. Synchronized workflows reduce the overall time required from the idea to realization. Drawings, plans and installation documents can be produced more quickly, and coordination between partners and customers is simpler and more efficient. Plants go into operation faster. The customer saves on planning and investment and can use the buildings sooner. The overall result is reflected in an improved return on investment (ROI).

This is GoGaS

Established in 1946, GoGaS has become a key innovation and technology partner to many customers and Who is Who in their industries, providing sustainable, environment friendly and innovative turnkey solutions for buildings, manufacturing process up to CO2 neutral operation. The unique portfolio includes a wide range of modular system and turnkey solutions such as IR, UV, UV-C, Aircondition, Heating, Cooling, Ventilation, Solar Systems and others for stationary, mobile and portable in- and outdoor applications. The company is active in several standardization committees, defining the next generation of technology standards such as TGA+.

GoGaS is a stakeholder in leading trade associations and initiatives, e.g. the German Engineering Association e.V. (VDMA), figawa, Export Initiative Energy, ELVHIS. (VDMA), figawa, Export Initiative Energy, ELVHIS. As an active partner of the Sustainability Initiative "Blue Competence", GoGaS is also driving the future of environment friendly and energy efficient planning, building and operating of B2B buildings, thus optimizing its CO2 footprint and maintaining the highest possible asset valuation, ROI and TCO for investors, owners, operators and tenants at the same time. The company is also involved in key research programs of the EU and industrial technology partners. GoGaS provides its customers with turnkey solutions, reducing the number of interfaces, eliminating delays in the Supply Chain and project execution and provides a lifetime warranty and support service.
