

PRESS RELEASE

GoGaS - Your partner for infection prevention on site

Mobility has a future! The greats of the automotive industry will come together on October 4 in Wolfsburg at the Automotive Supplier Summit. The B2B management conference for the automotive and supplier industry with accompanying exhibition is considered one of the most important events in the industry worldwide - and thanks to falling corona incidences, it will not only take place online, but also as a hybrid event finally live on site again in Wolfsburg's Congresspark. Almost 900 conference topics, more than 60 interesting sponsors and exhibitors, numerous speakers in exciting keynote sessions as well as productive discussions at the booths: The audience can look forward to an exclusive trade exhibition with plenty of space for exchange and innovation.

Personal encounters in a safe environment

Personal encounters are the heart of a conference and should be possible without danger even in times of a pandemic - because unfortunately Corona is still not completely over. To ensure the safety of its visitors, the Automotive Supplier Summit has GoGaS exclusively at its side, an expert in infection control whose innovative solutions make it a true partner in the spirit of the conference. The Dortmund-based company is regarded as one of the world's leading leaders in the fields of heating, cooling and ventilation of industrial buildings, with top expertise in mechanical and plant engineering. GoGaS' decades of experience have led to the development of groundbreaking innovations in indoor air hygiene and infection control: state-of-the-art chemical- and ozone-free indoor air disinfection systems work with UV-C light and set standards worldwide.

A product ensures hygienically clean air

Whether in the exhibition halls, on or in front of the podium: With its simple elegance, the INTERsens® 250R stands almost invisibly in the room and ensures hygienically safe interiors - audience and speaker are equally protected. The device disinfects the room air using the latest UV-C technology, killing all viruses, bacteria and other germs. The principle is as simple as it is ingenious: Air is drawn in at the bottom and irradiated with UV-C light inside the column. At the top, the disinfected air flows out again, without any drafts. In this way, the air of the entire room is continuously disinfected. The column is absolutely safe because no UV-C light can penetrate to the outside and disinfects so quietly that the operation on site is not disturbed.

What passes through hands must be disinfected

Where people meet, and pens or microphones may be passed on, the disinfection of objects is also of great importance. Here GoGaS offers the ideal tool with the PROsens H box: Everything you put in the box is hygienically cleaned inside by UV-C light. The disinfection process is characterized by very easy handling and is absolutely gentle on the material.

A successful event

Whether visitors, speakers or exhibitors, GoGaS products ensure that the Automotive Supplier Summit is a successful event that everyone can attend with a good feeling of security.

This is GoGaS

Established in 1946, GoGaS has become a key innovation and technology partner to many customers and Who is Who in their industries, providing sustainable, environment friendly and innovative turnkey solutions for buildings, manufacturing process up to CO2 neutral operation. The unique portfolio includes a wide range of modular system and turnkey solutions such as IR, UV, UV-C, Air-condition, Heating, Cooling, Ventilation, Solar Systems and others for stationary, mobile and portable in- and outdoor applications. The company is active in several standardization committees, defining the next generation of technology standards such as TGA+.

GoGaS is a stakeholder in leading trade associations and initiatives, e.g. the German Engineering Association e.V. (VDMA), figawa, Export Initiative Energy, ELVHIS. (VDMA), figawa, Export Initiative Energy, ELVHIS. As an active partner of the Sustainability Initiative "Blue Competence", GoGaS is also driving the future of environment friendly and energy efficient planning, building and operating of B2B buildings, thus optimizing its CO2 footprint and maintaining the highest possible asset valuation, ROI and TCO for investors, owners, operators and tenants at the same time. The company is also involved in key research programs of the EU and industrial technology partners. GoGaS provides its customers with turnkey solutions, reducing the number of interfaces, eliminating delays in the Supply Chain and project execution and provides a lifetime warranty and support service.
