

PRESS RELEASE

Pandemic protection in the hotel and restaurant industry: Benefit from state support!

The hotel and restaurant industry is in the middle of the Corona winter and has to master the difficult task of maintaining safe and profitable operations despite massive restrictions. The experience of the last few weeks has shown: Guests feel most comfortable where they feel optimally protected, and staff are also particularly motivated to work in an environment with high hygiene standards. Therefore, it should be a top priority, especially now, to invest in concepts that guarantee precisely this safety. Every hygiene protection measure is also an investment with foresight: Should the Corona pandemic finally be over at some point, most visitors and guests will probably expect the hygiene standards now established in the future as well. Scientists are also already warning of new pandemics - those who prepare for them today are playing it safe.

GoGaS offers hotel and restaurant operators tailor-made and effective hygiene concepts, the components of which are state-subsidized!

For the following GoGaS products, you can get up to 90 per cent of the acquisition costs reimbursed under Überbrückungshilfe III Plus:

INTERx® room air disinfection with UV-C light:

- INTERsens® 250R: Pedestal for mobile installation in the room
- INTERsens® 250: Wall or ceiling box for space-saving fixed installation
- INTERsan® 25/50: Small wall or ceiling box for the sanitary area

Since coronaviruses are mainly spread via infectious aerosols, indoor air purification is of crucial importance. With the INTERx® system, GoGaS has developed a highly effective and environmentally friendly method for disinfecting room air: Room air is sucked into the interior of the units and irradiated with UV-C light. This process reliably kills viruses, bacteria and fungi. The clean air then flows back into the room - quietly and without any draughts. The units are absolutely safe because no UV-C light can penetrate to the outside and work without chemicals or ozone. The operation complies with worldwide WHO standards and medical norms.

GoGaS VARIOMAX®: Energy-efficient patio heater for outdoor use

Despite the best indoor air hygiene, businesses reach their limit when the number of guests indoors is restricted due to legal requirements. Therefore, if you want to extend your business to the outdoor area, you need effective radiant heaters in winter - another core competence of GoGaS! The VARIOMAX radiant heater is robust and weatherproof, easy to install, scores with high energy efficiency, simple operation and short warm-up time - and is also state-subsidized within the framework of Corona aid!

HALYARD-FFP2 masks: top-class protective masks

Whether reception, kitchen, service or cleaning staff: Corona protective masks are mandatory for hotel and restaurant employees. Since it is part of the GoGaS company philosophy to always offer total solutions for its customers, we naturally also have FFP2 protective masks in our portfolio. We source and distribute masks from the established US company HALYARD, which not only meet all global hygiene standards, but also our high quality standards. In addition, the HALYARD FFP2 masks are characterized by pleasant wearing comfort - and their purchase can also be subsidized by the state!

Do you have questions about our products, the details of state subsidies or do you need help with the application process? We will gladly take care of the details and support you in all matters.

Contact us at any time, your safe operation is close to our hearts!

This is GoGaS

Established in 1946, GoGaS has become a key innovation and technology partner to many customers and Who is Who in their industries, providing sustainable, environment friendly and innovative turnkey solutions for buildings, manufacturing process up to CO2 neutral operation. The unique portfolio includes a wide range of modular system and turnkey solutions such as IR, UV, UV-C, Air-condition, Heating, Cooling, Ventilation, Solar Systems and others for stationary, mobile and portable in- and outdoor applications. The company is active in several standardization committees, defining the next generation of technology standards such as TGA+.

GoGaS is a stakeholder in leading trade associations and initiatives, e.g. the German Engineering Association e.V. (VDMA), figawa, Export Initiative Energy, ELVHIS. (VDMA), figawa, Export Initiative Energy, ELVHIS. As an active partner of the Sustainability Initiative "Blue Competence", GoGaS is also driving the future of environment friendly and energy efficient planning, building and operating of B2B buildings, thus optimizing its CO2 footprint and maintaining the highest possible asset valuation, ROI and TCO for investors, owners, operators and tenants at the same time. The company is also involved in key research programs of the EU and industrial technology partners. GoGaS provides its customers with turnkey solutions, reducing the number of interfaces, eliminating delays in the Supply Chain and project execution and provides a lifetime warranty and support service.
