

# PRESS RELEASE

**Safe ambient air with INTERsens® - now also as an attractive leasing model for more financial flexibility**

The certified INTERsens® indoor air disinfection system sets new standards: Our products disinfect indoor air with UV-C light. State-of-the-art technology reliably eliminates viruses, bacteria as well as fungi and of course also protects against SARS-CoV-2. The protective performance of all INTERsens® devices complies with medical norms and worldwide WHO standards. The disinfection process is not only fast and effective, it is also particularly environmentally friendly: UV-C light works quietly, without chemical additives, ozone-free and produces no hazardous waste such as toxic exchangeable filters.

## **Rely on the highest hygiene standards in the long term**

Whether you choose the mobile INTERsens® 250R floor-standing column, which can be flexibly positioned in different rooms, or the space-saving INTERsens® 250 model, which can be inconspicuously mounted on the wall or ceiling: Every hygiene protection solution is an investment

with foresight: Should the Corona pandemic be over at some point, the hygiene standards now established will be a matter of course for visitors, guests, customers and staff. Scientists are also already warning of new pandemics - those who prepare for them today are playing it safe. That's why more and more companies are opting for long-term infection protection for their indoor spaces with INTERsens® 250R or INTERsens® 250.

### **Our leasing offers have many advantages**

If you would like more leeway when investing in our products, you can now opt for our attractive leasing models, which we offer together with our leasing partner Archimedes. You will benefit from many advantages:

- Greater financial room for manoeuvre, as credit lines are not burdened.
- All leasing instalments are fully tax-deductible business expenses
- Planning security through fixed monthly instalments
- Individual terms allow the greatest flexibility possible
- Leasing helps to keep up with the latest technology

### **We offer the following leasing conditions (full amortisation / term 48 months):**

- INTERsens® 250R floor-mounted unit: from 58.90 euros monthly leasing rate (plus VAT)
- INTERsens® 250 wall-mounted unit: from 42.48 euros monthly leasing instalment (plus VAT)

Would you like alternative leasing periods? Contact us, we will be happy to prepare an individual leasing offer for you!

## This is GoGaS

Established in 1946, GoGaS has become a key innovation and technology partner to many customers and Who is Who in their industries, providing sustainable, environment friendly and innovative turnkey solutions for buildings, manufacturing process up to CO2 neutral operation. The unique portfolio includes a wide range of modular system and turnkey solutions such as IR, UV, UV-C, Air-condition, Heating, Cooling, Ventilation, Solar Systems and others for stationary, mobile and portable in- and outdoor applications. The company is active in several standardization committees, defining the next generation of technology standards such as TGA+.

GoGaS is a stakeholder in leading trade associations and initiatives, e.g. the German Engineering Association e.V. (VDMA), figawa, Export Initiative Energy, ELVHIS. (VDMA), figawa, Export Initiative Energy, ELVHIS. As an active partner of the Sustainability Initiative "Blue Competence", GoGaS is also driving the future of environment friendly and energy efficient planning, building and operating of B2B buildings, thus optimizing its CO2 footprint and maintaining the highest possible asset valuation, ROI and TCO for investors, owners, operators and tenants at the same time. The company is also involved in key research programs of the EU and industrial technology partners. GoGaS provides its customers with turnkey solutions, reducing the number of interfaces, eliminating delays in the Supply Chain and project execution and provides a lifetime warranty and support service.
