

PRESS RELEASE

Medical FFP2 masks from GoGaS: Best protection with highest quality standards. The mask makes the difference.

Corona pandemic - and unfortunately no end in sight. While parts of Germany are in the middle of the fourth wave, experts are already warning of an impending fifth wave. The fact is: the COVID 19 crisis will not only occupy us over Christmas and New Year's Eve, but will probably accompany us into next year.

Whether vaccinated, recovered or tested: With incidences rising to exploding, following the AHA rules is still the order of the day to protect yourself and others from the virus: Keep your distance, observe hygiene, wear a functioning medical mask in everyday life.

But which mask provides the best protection, complies with the legal requirements and is still comfortable to wear? Reports about poor-quality respirators, often imported from the Far East, have repeatedly caused uncertainty in recent months. If you want to be on the safe side and only the best is good enough, you should choose the certified FFP2 masks from GoGaS partner HALYARD.

The Dortmund-based company GoGaS has made a worldwide name for itself in chemical- and ozone-free infection control with the development of a modern, effective and sustainable overall portfolio based on UVC. The product disinfection and room air hygiene concepts of GoGaS are used, among others, in health care, administration, industry and services, as well as at numerous congresses, events and functions, and ensure optimal protection and well-being for visitors in times of corona.

Since it is part of the company's philosophy to always offer its customers optimal and sustainable total solutions, GoGaS also has first-class corona protective masks in its portfolio. GoGaS Health & Safety therefore took a very close look around the market for professional FFP2 masks, carefully examined them - and decided on the established, American manufacturer HALYARD, whose particle-filtering FFP2 half mask meets all the requirements for a safe respiratory protection mask:

- All materials sustainable, environmentally friendly, recyclable
- Worldwide certified production sites
- CE marking according to EU Medical Devices Regulation
- CE marking for personal protective equipment
- In proven widespread use in health care, Germany, Europe, Worldwide
- 5 years durability

The GoGaS mask is not only top class in terms of safety, it also stands out for its exceptional wearing comfort:

- Aluminium nose clip easily adjusts the mask to the shape of the face
- Larger chamber provides more breathing room (duckbill mask)
- Secure and tight fit
- Comfortable to wear - also for wearers of glasses and hearing aids
- Fewer problems with lenses fogging up
- Less skin irritation and skin sensitization

It was not without reason that GoGaS chose HALYARD as its partner: The US company has been developing face masks for over 20 years and is considered one of the leading global manufacturers. From the development of the mask to the selection of raw materials to the manufacturing process and delivery: HALYARD offers exactly the high quality standard that GoGaS expects from its business partners - because our customers also expect this standard!

The FFP2 mask from HALYARD is in stock and available for immediate delivery!

This is GoGaS

Established in 1946, GoGaS has become a key innovation and technology partner to many customers and Who is Who in their industries, providing sustainable, environment friendly and innovative turnkey solutions for buildings, manufacturing process up to CO2 neutral operation. The unique portfolio includes a wide range of modular system and turnkey solutions such as IR, UV, UV-C, Air-condition, Heating, Cooling, Ventilation, Solar Systems and others for stationary, mobile and portable in- and outdoor applications. The company is active in several standardization committees, defining the next generation of technology standards such as TGA+.

GoGaS is a stakeholder in leading trade associations and initiatives, e.g. the German Engineering Association e.V. (VDMA), figawa, Export Initiative Energy, ELVHIS. (VDMA), figawa, Export Initiative Energy, ELVHIS. As an active partner of the Sustainability Initiative "Blue Competence", GoGaS is also driving the future of environment friendly and energy efficient planning, building and operating of B2B buildings, thus optimizing its CO2 footprint and maintaining the highest possible asset valuation, ROI and TCO for investors, owners, operators and tenants at the same time. The company is also involved in key research programs of the EU and industrial technology partners. GoGaS provides its customers with turnkey solutions, reducing the number of interfaces, eliminating delays in the Supply Chain and project execution and provides a lifetime warranty and support service.
